# COVID-19 Hospital Occupancy and Capacity in Montana

Status Report as of 11/3/2020

# **Statewide Snapshot**

Beds, ICU, and ventilator availability are important factors to consider during the COVID-19 response. As cases require additional support, hospital resources respond to the increasing demand. Total availability and usage are depicted below, indicating the usage due to COVID-19.

Hospitals report data on beds, ICU and ventilator capacity daily, among other indicators of readiness and ability to respond to COVID-19 at their local facility. Data is updated throughout the data and summarized by the end of day. Data is subject to change during the day, as demand changes throughout the day.

Bed capacity varies by region and indicates severity of strain on hospital beds as COVID-19 cases increase in different areas of the state. This map displays the percentage of inpatient beds occupied. Green shading indicates more beds are open, red shading indicates nearing capacity. A list of facilities by county can be found at the end of this report.
